# Power Retail

Customised POS checkout

The well-rounded retail POS solution works on a wide range of devices, from dedicated POS terminals to PCs and mobile devices. With direct connectivity to the Microsoft Dynamics 365 Business Central and Dynamics NAV ERP systems, inventory data is automatically updated and available to accounting and finance in real time.

POS checkout   **E-invoices**   **Inventory refresh**   **Loyalty cards**

How will the solution help you?

Full integration

Power Retail is fully integrated with Microsoft Dynamics 365 Business Central or Navision. It thus allows you to make a range of personalisations and modifications to suit your business. You can easily manage, add or remove users from the central system.

Equipment connectivity

Connect all your equipment quickly and easily via a wireless connection. You can connect a POS printer, a regular printer, a POS terminal, a barcode scanner, and other connectable devices.

Business support

Documents available in the system include sales orders, posted invoices, credit notes, and delivery notes. The system allows loyalty cards and thus a dedicated reward system for loyal customers. You can also use the app on mobile devices, so you are fully mobile, anytime and anywhere.

Flexibility for different branches

Control the entire sales process, from service and sales to performance analysis. It also offers the ability to store invoices and connect to a POS terminal to issue electronic invoices in a customisable format.

+ **ERP connectivity**   + **Solution flexibility**   + **Mobile application**   + **Excellent user experience**
