Power Your Business

# AllForWeb

## A customised solution for your online business

An online solution that you can tailor to your preferences and type of business. AllForWeb is based on Umbraco Web Content Manager, one of the best known interfaces due to its flexibility and updatability when you need it.

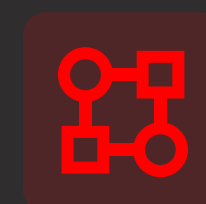

Websites

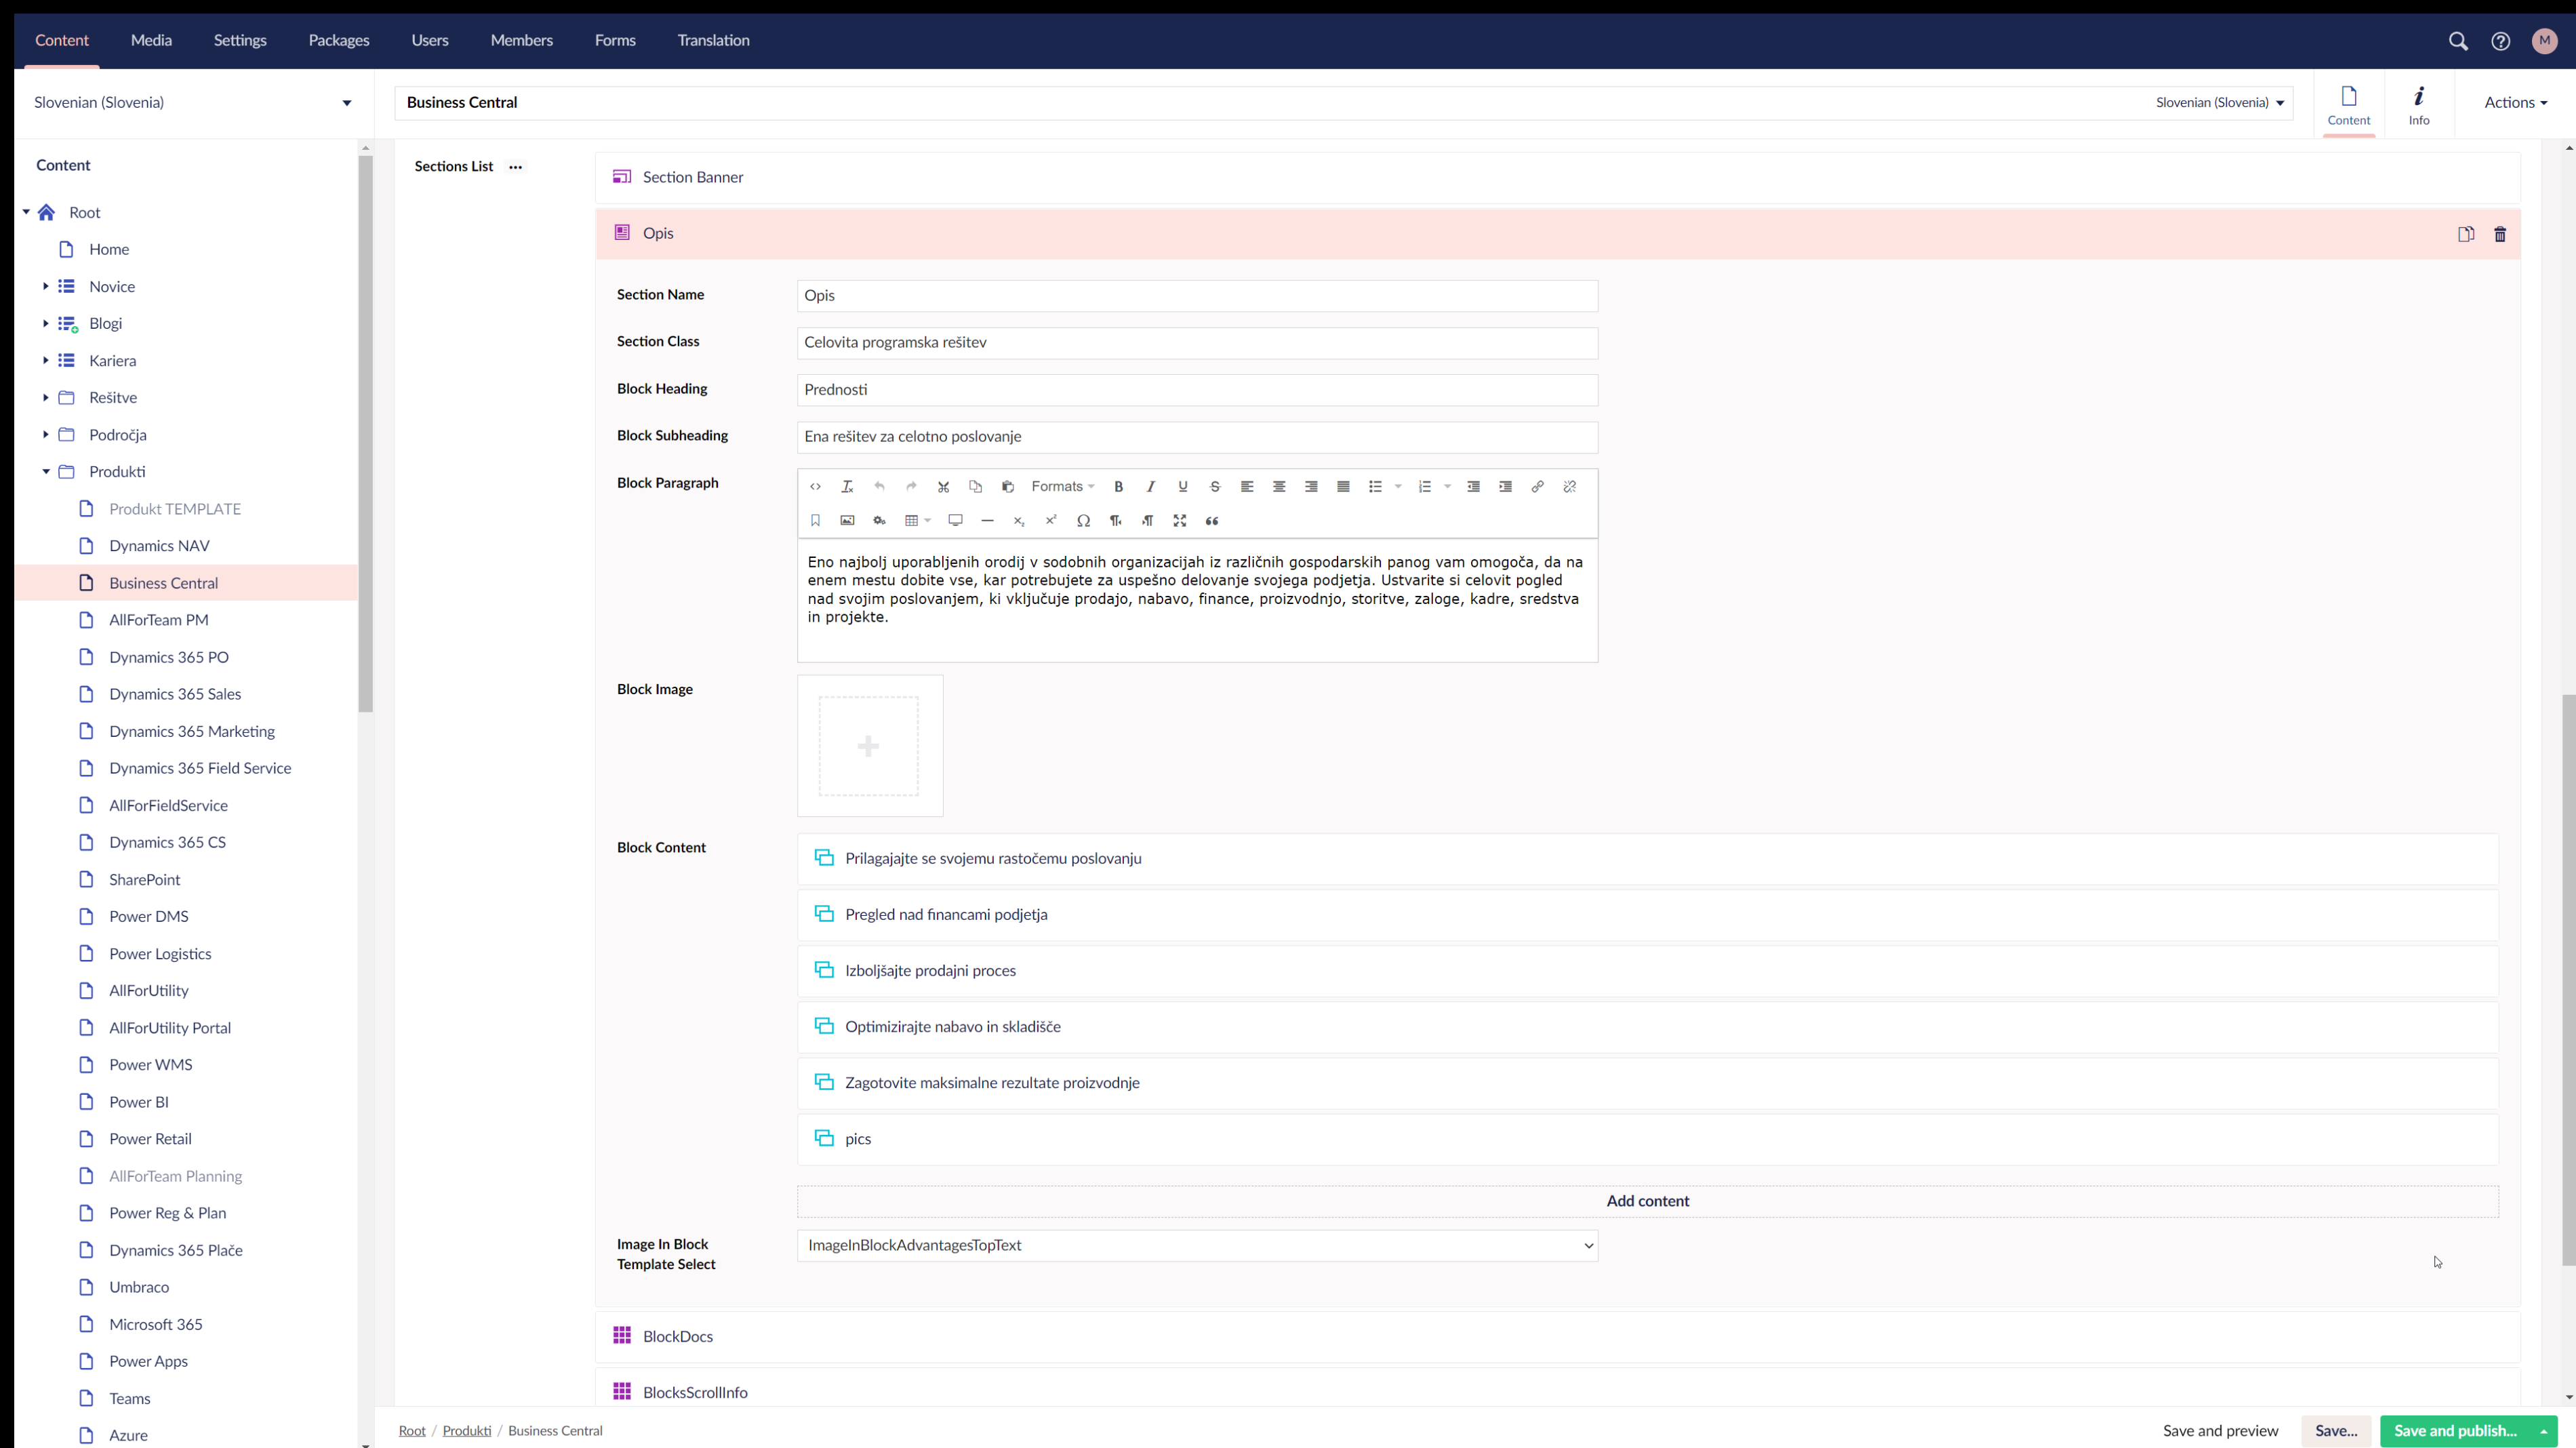

Online shops

Portals

Customised  
solutions

# How will the solution help you?

## Websites

Due to the open source platform, you have endless possibilities to design websites that delight users with their fast performance and responsiveness, regardless of being viewed on a computer or mobile device. Design web content with a streamlined interface that enables multilingual content, easy content entry and SEO optimisation.

## Online Stores

Adapt the design of your online store to the overall graphic image of your company. Creating an online store with the Umbraco interface and the AllForWeb solution is a flexible approach that allows a range of extensions and functions for B2B or B2C e-commerce. Integration with ERP – Business Central/Navision gives you a real-time overview of stock, shopping carts, customers or changes in product price.

## Portals

Advanced portals make it easier and more efficient for your business partners to communicate with you and manage orders and payments, while allowing you to view and manage important information about sales activity in one place. With the option to integrate with ERP or other external systems, the interface allows you to implement your preferred business logic.

## Flexible Solutions

AllForWeb's flexibility makes it the ideal tool for developing customised solutions. The tool allows integration with many other tools and applications, and offers the possibility to create your own environments such as intranets, extranets, and other solutions. There are many possibilities for customisation and extensions.

+ Exceptionally  
customisable

+ Fast  
operation

+ Connectivity with  
ERP systems

+ Up-to-date  
interface
